

21-22 In Person Instruction Plan, updated 3-15-22

Child Care/Recreation Program

The child care/Recreation program will have 3 indoor spaces. Groupings will be K/1, 2/3 and 4/5. Outdoor recreation will be encouraged.

Teaching Spaces

Outdoor Learning Space

- Some outdoor teaching will occur.
- Appropriateness of the outdoor conditions will be a judgment call made by individual teachers.
- Students will need to dress warmly and in layers on cold days.
- Students will NOT be required to wear masks

Indoor Learning Space

- Classrooms will be well ventilated by keeping doors and windows open as much as possible.
- Each classroom has one or two heat pumps that circulate existing air in the classrooms.
- All classrooms have two different sizes of portable air purifiers that can filter virus size particles.
- Students will need to dress warmly and in layers on cold days
- Students will be required to wear masks, until April 18th. They will then be strongly recommended but not required unless PH issues new requirements.
- We will try to seat students 3 feet apart, but it may not always be possible.

Materials

- Sharing of materials in the classroom will be limited.
- The school will provide students with their own supplies.
- Students will hand wash or sanitize before using communal items.

Cleaning

- Desks, tables, faucets, door handles, and light switches will be cleaned regularly
- Tables where students eat will be cleaned after snack and lunch. The wooden tables now have cleanable tablecloths.

Hygiene

Hand Washing or sanitizing will occur:

- Upon arrival at school
- Upon entering and exiting classroom
- Before and after eating and using playground equipment
- After using restroom
- After wiping nose or using a tissue
- At dismissal

All classrooms have sinks, soap and paper towels for handwashing.

Hydration

- No drinking fountains - they are blocked or disabled.
- Students will bring their own water bottles that can be refilled at the outdoor water bottle filler or at sinks.
- Disposable paper cups are available if students forget their water bottle.

Snack/lunch

- Students will eat snack/lunch outdoors.
- Students will remove masks for eating and will sit at least 6 feet apart.

Student/Staff Health Check and Illness While at School

Students

- All families will agree to keep children home who are ill and/or had a fever less than 24 hours prior to school without the use of fever reducers.
- If a child becomes ill at school or shows evidence of symptoms that do not allow them to stay at school, they will be isolated until they are picked up.

Teachers and Staff

- If a teacher develops symptoms that necessitate they leave campus, is unable to work, or needs to quarantine, individual classes could temporarily move to short term independent study packets.
- Substitute teachers may not be available.

Masks

Adults

- Teachers and staff will wear masks in enclosed or shared workspaces such as the office, classrooms, kitchen, bathroom, and copy room.
- Teachers and staff will wear masks when in the presence of children and other adults inside.

High Quality masks are surgical, kn95 or n95 and are strongly recommended. Other acceptable types of mask

- Masks may be homemade or store bought.
- They should be at least 2 layers of fabric (cotton preferred) and have a snug fit over the nose and under the chin.
- Masks with vents are not approved unless they have 2 layers of fabric or a filter between the face and the vent.
- Bandanas are not approved masks.
- Gaiters may or may not be appropriate depending on how they are made. They need to be multiple layers of fabric (cotton preferred) or have a filter pocket with a filter, and fit snugly over the nose and under the chin.
- Masks will be available for students who do not provide their own.
